 github.com/DIYAA0606  leetcode.com/Diya_6

SUMMARY

Information Technology student with strong foundations in DSA, OOP, full-stack and mobile app development. Built projects using React, Kotlin, JavaScript, Firebase, and REST APIs. Active campus leader with 60+ problems solved on LeetCode and HackerRank.

EDUCATION

B.Tech in Information Technology

Pune Institute of Computer Technology

📅 08/2024 – 05/2028

CGPA: 9.75 / 10

POSITIONS OF RESPONSIBILITY

Vice President – EDC PICT

Entrepreneurship Development Cell,
Pune Institute of Computer Technology

- Coordinating student initiatives, events, and collaborative execution within the Entrepreneurship Development Cell.
- Working with teams on planning, delegation, and cross-functional coordination activities.

CERTIFICATIONS

HackerRank – Problem Solving (Basic)

HackerRank – Java (Basic)

Coursera – Foundations of Cybersecurity

SKILLS

Java C/C++ Kotlin

JavaScript Python

React.js HTML CSS

Bootstrap Firebase

Git GitHub Android Studio

DSA OOP IoT

AI/ML Cybersecurity

PROJECTS

PlacePrep – Placement Preparation Platform

 placement-dashboard

HTML · CSS · JavaScript · GitHub

- Built a placement preparation platform focused on DSA practice, resume guidance, and internship preparation.
- Designed responsive frontend pages using HTML, CSS, and JavaScript with modular UI structure.
- Used GitHub workflows and version control for collaborative development and deployment.

HerCare – Women's Health Platform

 herCare

React · Firebase · JavaScript

- Developed responsive frontend components using React and reusable UI structures.
- Integrated Firebase concepts for authentication and scalable application flow.
- Focused on accessibility, intuitive navigation, and user-friendly design.

Smart Irrigation & Soil Monitoring App

 smart-pant-care

Kotlin · Android Studio · OpenWeatherMap API

- Built an Android app during a hackathon with dashboard, weather tracking, and irrigation recommendation features.
- Integrated OpenWeatherMap API to fetch real-time weather data and improve irrigation accuracy.
- Implemented rule-based irrigation logic using moisture levels and environmental conditions.
- Structured the application for future IoT integration and scalability.

PROBLEM SOLVING

- Solved **100+ problems** on LeetCode & HackerRank across Easy, Medium, and Hard levels.
- Proficient with arrays, linked lists, stacks, queues, and binary trees.
